

## **AMSOIL MP and Silicone Spray withstands the demands of gun owners in the dry dusty Arizona desert.**

Terry Showalter, Manager of American Guns and Ammo was delighted to carry AMSOIL MP and Silicone Spray as a Retail Account after he tried a complimentary can of MP. Terry is a shooter of auto loading firearms himself including the popular AR-15. He was looking for a product to protect his AR-15 that wouldn't "gum up" or attract dust as so many do. The AR-15 is used under the demanding conditions encountered in competitive shooting situations and in a dusty hot environment.

Terry was impressed by how the MP could be sprayed onto the firearm and would evaporate after sometime and still leave the firearm protected. Because the carrier oils in the MP evaporate leaving a dry synthetic film on the parts, dust isn't attracted to them.

Terry also uses the AMSOIL Silicone Spray on his firearms as well. He has found that unlike lesser quality silicone sprays the AMSOIL Silicone Spray Lube doesn't "gum up" and cause jams. He also likes the AMSOIL Silicone over the Hornaday Spray lube for reloading tasks. Terry says the AMSOIL Silicone works as good as or better than Hornaday's version and costs less for more.

A side benefit of the AMSOIL products that Terry likes is that they don't smell nearly as bad as other products on the market.
